Cheat meal/ refeeds: will be on my call

Cardio Plan:

5x a week 50 min POST workout or fasted. Aim to burn 500-600 calories.

Keep heart rate between 135-150 bpm. Cardio either post workout or fasted in the morning (only if your schedule allows it)

Intra workout carbs: PUSH 1 days ONLY. 25 gr of highly branched cyclic dextrin

Non negotiable: 1-1.5 gallons of water a day, 6.5-8 hrs of sleep a day, add plenty of pink salt to your meals.

Food options:

You can replace anything you want with things in the list. Keep the same portions and only switch proteins to proteins, carbs to carbs, and fats to fats. Same thing with lean proteins and fattier protein sources for example: if you want to replace chicken breast don't do steak or ground beef. Use another lean protein source like white fish, Eggwhites, turkey breast, etc. If you want more foods outside of the list, you're welcome to but make sure to stay within the same **macros** and track everything on my fitness pal to make sure you're within your numbers. My suggestion is, plan your day in advanced, anything you want to eat or restaurant you want to visit (look at the menu in advanced or text it to me and I'll help) and put it into the app

Protein: Ground turkey 93% lean or higher, Ground beef 93% lean or higher, flank steak, skirt steak, london broil, shrimp, tilapia, salmon, egg whites, turkey breast, fat free cheese, whey protein isolate, tempeh, tofu, fat free plain greek yogurt, edamame

B.B.

Carbs: Sweet potato, red potato, jasmine rice, brown rice, whole wheat wraps, whole wheat bread, oatmeal, cream of wheat, cream of rice, cereals, english muffins, beans, lentils, pasta,

Fats: Olive/ coconut/ macadamia oil, eggs, avocados, peanut/ almond butter, any kind of nuts, grass fed butter, hummus.

Seasonings: Use anything low/ calorie free. The range is 0-20 calories per serving. Mustard, lime, Franks, sriracha, salsa, super light mayo, ms dash, anything by G Hughes, flavor drops, stevia, splenda, etc

Drinks: Anything that's calorie free or under 10 calories per serving, unsweetened tea, bcaas, glutamine, preworkouts, coffee (light almond milk is ok), diet soda, sparkling water, crystal light, etc.

Workout Plan:

Weekly split:

Day 1: Push 1
